

CLAIMS

I claim:

1. A mobile telephone device with means for audio indication of call status.
2. A mobile telephone device as in claim 1 wherein said audio indication is a pre-recorded audio message stored in said mobile telephone device.
3. A mobile telephone device as in claim 1 wherein said means for audio indication selectively plays a pre-recorded audio based on the call status, whereby said audio indication is triggered by call termination.
4. A mobile telephone device as in claim 3 wherein said audio indication is played upon reception of a trigger signal.
5. A mobile telephone device as in claim 3 wherein said trigger signal is received from the mobile telephone communications service provider.
6. A mobile telephone device with means for generating a “bad connection” signal within said mobile telephone device.
